* Investment in securitized debt including pass through certificate (PTC) shall not exceed 20% of the net assets of the Scheme. The Scheme will not invest in foreign securitized debt.

The Scheme may use derivatives for purposes as may be permitted from time to time. The maximum derivative position will be restricted to 50% of the net assets of the Scheme.

The Scheme may seek investment opportunity in foreign securities in accordance with the guidelines stipulated by SEBI and RBI from time to time. The exposure to foreign securities (including mutual fund and other approved securities) shall not exceed 50% of the net assets of the Scheme.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

- Equity and equity related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of equity and equity related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Scheme may be adversely affected. Equity and Equity related Instruments listed on the stock exchange carry lower liquidity risk but they run a settlement risk and also the risk of inability to sell securities held in the Scheme's portfolio. Further, Equity and Equity related Instruments not listed on the stock exchanges may be illiquid in nature and carry a higher amount of liquidity risk.
- Risks associated with investing in fixed income and money market instruments involve interest - rate risk, credit risk, liquidity or marketability risk, re-investment risk etc.
- Risks associated with investing in ADR/GDR and foreign securities: To the extent the assets of the Scheme are invested in overseas financial assets, there may be risk associated with fluctuation in foreign exchange rates, restriction on repatriation of capital and earnings under the exchange control regulations and transaction procedure in overseas market. Investment in foreign securities carries currency risk. The exchange risk associated with a foreign denominated instrument is a key element in foreign investment.
- Risks associated with investing in derivatives: The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Other risks

include risk of mispricing or improper valuation and the inability of the derivative to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price.

- Risks associated with investing in securitized debt involve interest - rate risk, prepayment risk, credit or default risks. Further, Asset Backed Security (ABS) has structure risk due to a unique characteristic known as early amortization or early payout risk.
