

Religare Contra Fund

(An open-ended equity scheme)

December 2011

Markets move in herds

- Investors tend to follow trends and short term events
- Higher the prices go up, more the people want to buy!
- Herd mentality often leads to stocks trading at a much higher/lower level than their intrinsic value
- This creates 'Contra' opportunities

Contrarian Investing

- A contrarian goes against the crowd
- A contrarian looks for extreme situations
- A contrarian is early in investing in companies that have potential, even as the herd may be more focused on the risk associated with the company
- A contrarian sells companies that have performed more than their potential

Contrarian Investing

- A contrarian anticipates trends
- A contrarian buys ignored companies and then waits for the herd to discover them which then results in their share prices to go up
- A contrarian focuses on the big picture and long term fundamentals rather than short term events

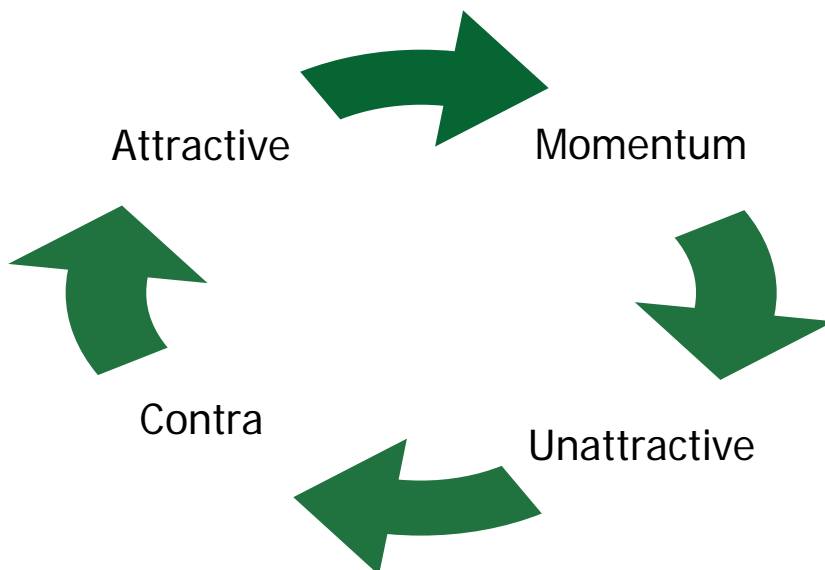

What the experts have to say about this..

“I will tell you how to become rich. Close the doors. Be fearful when others are greedy. Be greedy when others are fearful” .

- Warren Buffet, lecturing to a group of students at Columbia University

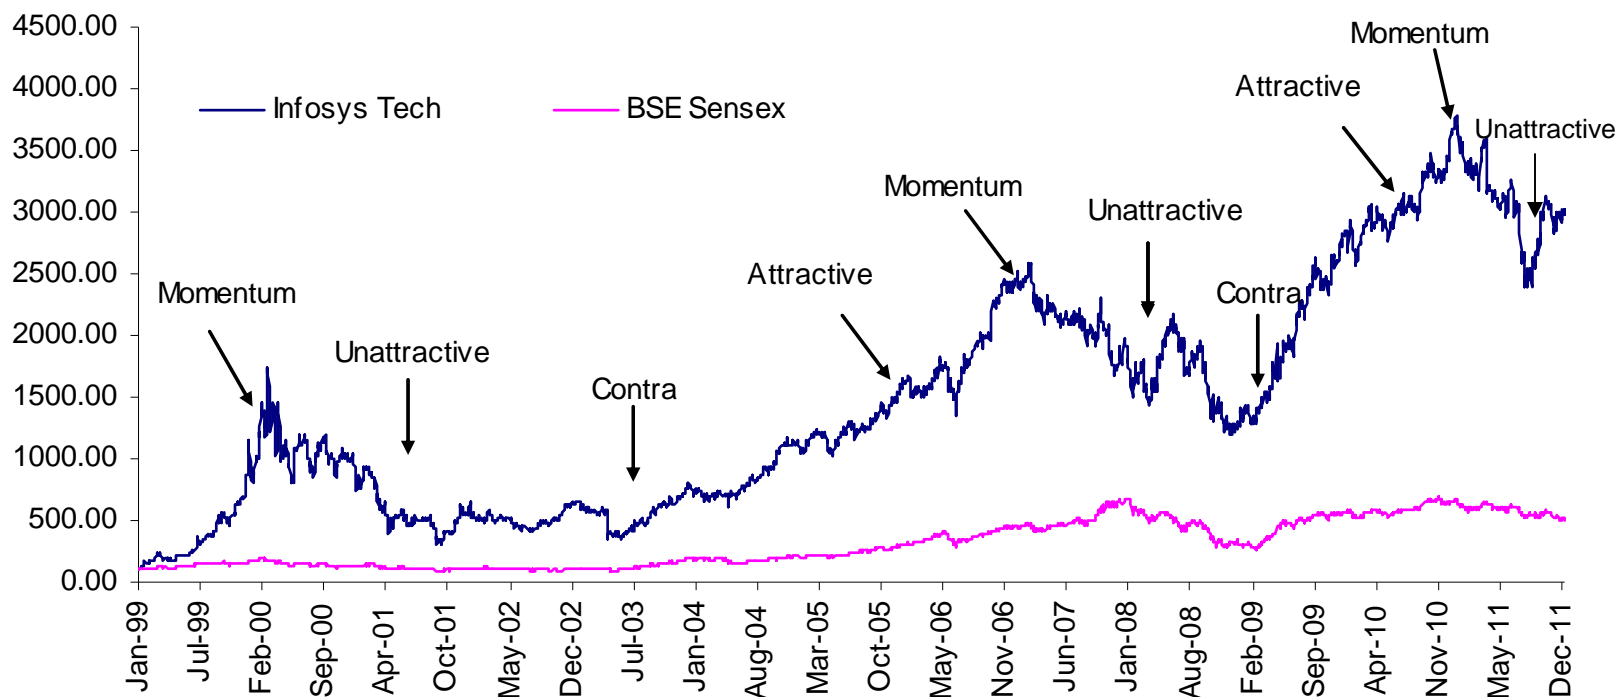

Stock and Sector Life Cycle

- All Stocks / Sectors have a life cycle
- Attractive Stocks perform → Herd Follows → Momentum Stocks
- Momentum results in overvaluation → Herd loses interest
- Contra opportunity arises
- Positive changes happen → Contra Stocks become attractive
- Cycle repeats

Stock Life Cycles - why does this happen ?

- Happens due to 'change' - favorable or unfavorable
 - Change in business environment/fundamentals
 - Change in business strategy
 - Change in growth trajectory
- Markets move in herds → Chase stocks with current positive change and ignore stocks currently facing trying environment

Contra Opportunities - Omnipresent

- All stocks during their life cycle
- All markets: bull or bear
- Within markets: large and mid caps
- Among sectors

Religare Contra Fund – Investment Strategy

- Invests in 'fundamentally sound' companies which are ignored by herd so far
- Believes in incubating stocks for a while before they find favour with rest of the market
- The fund sells stocks only when it finds valuations excessive or when business fundamentals deteriorate or when there are better alternatives. The fund does not sell just because the company has moved from the contra stage of its life cycle to the attractive stage of life cycle
- Anticipates favorable trends / changes in these companies
- Includes 'Special Situations' and 'Out of Ordinary' investing
- Diversified; No Cap bias
- The fund targets to stay invested at 90%

Investment Objective	To generate capital appreciation through investment in equity and equity related instruments. The Scheme will seek to generate capital appreciation through means of contrarian investing.
